- Introducing -

KEURIG® K2500™

Single-Serve Commercial Coffee Maker

Simplicity Meets Versatility

Brew more, fill less often
Can be plumbed for continuous brewing or use the optional
110 oz. pour over reservoir, the largest Keurig reservoir to date.

5 Cup sizes to choose from
4, 6, 8, 10 , and 12 ounce brew sizes.

Strong Brew
Brew a stronger, more intense cup. Increases the contact time between
coffee grinds and water, providing a stronger brew.

Quiet Brew Technology®
Quiet Brew Technology minimizes noise and allows for flexible placement.
Place in kitchens, conference rooms, or create multiple small coffee stations.

Easy to Clean
Designed for simple cleaning with wipeable non-porous surfaces.

Serviceable
Six serviceable modules help extend brewer life and provide
greater service flexibility.

The EPH Classified Mark is used for products complying with ANSI/NSF standards and other food equipment hygiene codes and requirements.
The K-2500™ brewer is a commercial coffee maker that combines flexibility with great features in a small package

Capacitive touch-screen can be used with a soft-tip stylus or bakery sheet

Reservoir option allows for user-friendly installation. No technician is required.

12" Wide

14.25" Deep

Small compact footprint and flexible design are perfect for placement in smaller non-communal areas

Designed for safety & cleanability. Commercially rated and meets NSF-4/ANSI cleaning and hygiene standards* for Foodservice locations

Simple cleaning procedure with recommended Urnex® products

Removable drip tray to accommodate larger cup sizes

What does it mean to for the K-2500™ Coffee Maker to be safe and cleanable?
## Meeting proper standards and certifications through intentional design and testing

Commercially Rated

(UL) is a certification agency that focuses mostly on equipment safety standards. The engineers at UL test both electrical and gas fired food service equipment to ensure that standards in soundness of design, electrical safety, and structural integrity are met.

Commercial UL EPH
Classified Certification

UL also has a sanitation classification that is similar to the one set forth by NSF International. In many instances, products listed as UL Sanitation certified are acceptable alternatives to NSF Listed items during health inspections.

Designed to meet all UL requirements for safety and sanitation

Non-porous plastics, metals, and glass are simple to wipe down

All accessible parts are evaluated for cleanability
