

500-25-SPU Snagless Networking Cable

Designed to handle high intensive bandwidth on your network connections.

The CyberPower Cat6 25 ft. (7.6m) 500Mhz patch cable for connecting a PC, Mac® or network device to 10Base-T, 100Base-T and 1000Base-T (Gigabit) Ethernet networks. Gold-plated copper contacts on the RJ45 male to male connectors provide excellent conductivity for accurate high-speed transmissions.

The snagless molded boot covers protect the RJ45 plug from damage during installation. Its molded strain relief construction provides internal stress relief at the termination point and flex relief at the cable exit.

A Limited Lifetime Warranty ensures that this network management card has passed our highest quality standards in design, assembly, material and workmanship.

Features

- 25 ft., Silver
- Cat6 Network Cable
- 500Mhz Transfer Rate
- 10/100/1000Mbps Ethernet Networks
- Snagless Booted Connectors
- Limited Lifetime Warranty
