# Google Meet Series One Room Kits

Keep conversations and ideas flowing in this new room kit that redefines today's collaboration experience. It's ideal for organizations using G suite and Google Meet for communication and has unique features like onboard AI and enterprise-grade components. The cost-effective kit comprises all components required for optimum collaboration, including a smart camera, audio bar, and cables. Available in three different sizes – small, medium, and large, it's designed to fit meeting rooms of all sizes and easy to manage and install.

Advanced noise cancellation technology, processed through Google's Edge TPU, helps deliver benchmark audio quality. The 4K-capable AI cameras enable distortion-free automatic framing of meeting participants. The touch controller makes joining meetings and sharing content easy and intuitive.

With the included mounting options, install the compute on or under a table, or behind a display, to keep it out of sight, yet easily accessible. One Ethernet cable keeps the installation process seamless and meeting space organized.

Series One room kits from Lenovo are easier and more cost-effective to install than almost any other option. With power and network combined in one Ethernet cable, there are fewer cables to run and less clutter under or on the table.

Digitally manage meeting facilities with one device

Combining innovative technology with personalized services, ThinkSmart solutions will improve the way employees work together in today's work-from-anywhere world.
