THE **POWER**  
OF PAPER

# 2008 IMAGING PAPERS GUIDE

**BOISE®**

Beyond What's Expected.™

# THE POWER OF CHOICE

## Why choose recycled?

Did you know that by switching to a 50% post-consumer (PC) content paper you can save more than just a tree or two? According to the Environmental Defense Organization, for every 10 skids of 20 lb 50% PC paper that you use instead of a non-recycled paper, you can:

- save 120 trees
- save enough energy to power one household for a year
- reduce greenhouse gases by the equivalent of one car's emissions in a year

It is important to ensure your hard work is well represented by being printed on the right paper, and adding recycled content says so much more! Grand & Toy® is committed to offering a full line of recycled papers for all your document needs.

Climate change, energy consumption and greenhouse gases are topics that have become important to everyone. Be a part of the solution while reducing your office spend by:

- switching to recycled papers
- reducing paper usage by duplexing your documents
- using recycled toner cartridges
- ensuring blue boxes are readily available in your office

## Paper Certifications

Grand & Toy® wants to ensure the papers we offer are manufactured using environmentally preferable processes. That is why we indicate the papers that are certified by the Sustainable Forestry Initiative® (SFI®), the Programme for the Endorsement of Forestry Certifications Schemes™ (PEFC™), EcoLogo™ or the Forest Stewardship Council® (FSC®).

## How to Choose the Right Paper

### Copy and Multipurpose Papers

Copy or multipurpose papers are ideal for day to day, black and white printing. Grand & Toy® and Boise® have a variety of high quality non-recycled and recycled papers in this category that range from:

- 92-96 bright
- 20-24 lb
- 30% - 100% post-consumer content

Although the most commonly used are 92 bright and 20lb, sometimes you need something a little different. When printing two-sided, it is best to use a 24lb sheet to reduce show-through. Or, if creating a memo or letter, add a little pizzazz with a 96 bright multipurpose paper. Using a 30%, 50% or 100% post-consumer content multipurpose paper not only benefits the environment, but can be a simple way for your company to demonstrate a commitment to sustainability.

### Technology Paper: Laser, Recycled Laser and Ink Jet

When adding colour images or graphs to a document, emphasize the quality and importance of your message by printing it on a laser or ink jet paper. Laser and ink jet papers are manufactured to function best with the respective laser or ink jet print technology. Because these papers are made with medium colour coverage in mind, they are brighter and heavier than multipurpose papers. Higher brightness creates more contrast and sharper colour images and the heavier weight prevents show-through. Look for an extensive offering of Grand & Toy® and Boise® Laser and Recycled Laser papers in a variety of sizes and weights to suit every need.

### Technology Paper: Colour Copy and Glossy Laser

The cream of the crop for printing with full colour or photo imagery. Customers will know you mean business when using a colour copy or a glossy laser paper. Offering the highest brightness levels, an extensive variety of weights and matching cover stocks, can help put your most important work in the professional spotlight. Print your own collateral and sales tools; create a glossy brochure or poster, all without leaving your office. You can further impress your audience by using the new, top of the line, 100% post-consumer content ASPEN™ Color Copy.

## THE RIGHT PAPER FOR YOUR DOCUMENTS

Depending on what type of document you are printing, there is an ideal paper that will suit it best.

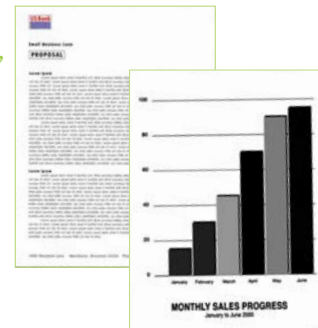

### Black and white text only

- G&T® Premium Copy
- Boise® X-9™
- Boise® ASPEN™ 30, 50 and 100
- Boise® ECO-ASPEN™
- Boise® SPLOX® and SPLOX® Recycled

### Black and white text or heavy black print coverage, with colour logos or highlighted text.

- G&T® Multipurpose
- Boise® X-9™ Hi-Brite
- Boise® SPLOX® Plus
- Boise® HD:P™ Everyday Laser

### Documents or promotional material with medium colour coverage such as graphs or colour images.

- G&T® Premium Laser
- G&T® Premium Recycled Laser
- Boise® HD:P™ Premier Print
- Boise® HD:P™ Presentation Laser & Cover
- Boise® ASPEN™ Laser
- G&T® Bright White Ink Jet

### Marketing and professional material with full colour coverage or photo quality images.

- G&T® Premium Colour Copier
- Boise® HD:P™ Color Copy and Cover
- Boise® ASPEN™ Color Copy
- Boise® HD:P™ Glossy Color Laser and Cover
