

Charge, Sync, Secure and Organize All Your Mobile Devices

Mobile devices like tablets, Chromebooks, laptops and smartphones have influenced every organization. As devices continue to multiply, charging and storing them becomes a challenge that calls for a purpose-built solution.

Tripp Lite charging stations and carts deliver outstanding value everywhere mobile devices are in use, including education, healthcare, retail, commercial, industrial and office settings. They secure up to 48 devices inside a locking steel enclosure, providing high-speed USB or AC charging, convenient syncing, comprehensive protection, clutter-reducing organization and flexible deployment.

HIGH-SPEED CHARGING

- Models with USB charging provide up to 2,4A per device.
- Models with AC charging provide an outlet for each device.

USB models provide the fastest charging supported by each device, up to 2,4 amps per port, increasing device availability. Capable of charging 16, 32 or 48 tablets, USB models can also charge smartphones and other USB devices.

USB models provide up to 2.4 amps per port.

AC models provide an outlet for each device's power adapter. They can charge 36 Chromebooks, laptops or tablets.

CONVENIENT SYNCING (USB Models)

The USB uplink port connects to a computer for device syncing.

Wired syncing updates software, backs up data and returns devices to standard configurations without taxing busy Wi-Fi networks. USB and AC models also allow wireless syncing.

COMPREHENSIVE PROTECTION

- Steel enclosure locks securely with included keys to discourage device theft, damage or tampering.
- Powder-coated finish promotes long-term durability.
- Flow-through ventilation moderates temperatures.
- Protective shelf finish helps prevent device scratches.
- Rubber grommets reduce cord wear.
- Extra-secure 3-point lock latches doors at top, middle and bottom (most models).
- Padlock hasp and cable/chain lock ports support supplemental user-supplied locks (select models).

CLUTTER-REDUCING ORGANIZATION

- Device slots fit full-size laptops (select models).
- Removable dividers accommodate larger devices.
- Built-in cord management reduces cable clutter.
- Doors open at least 180° for improved access to devices.
- Toolless access panels conceal USB ports and cord slack, but remove easily for access (select models).
- Outlets on AC models accommodate bulky power adapters without blocking adjacent outlets.

FLEXIBLE DEPLOYMENT

- Most models are available as mobile charging carts or charging stations that support optional cart conversion.

USB models have mounting slots to support installation on a wall.

- USB models include rear wall-mount slots and also support placement on a desk, table, counter or floor.
- All models arrive ready for quick deployment, with minimal assembly requirements.

CONVENIENT MOBILITY (CARTS)

- Wide-grip handle assists cart control.
- Swivel casters with large, non-marking wheels improve handling over uneven surfaces.
- Casters lock to help prevent unwanted movement when cart is at rest.
- Input cord wrap keeps cord out of the way when moving cart from room to room.
