

## **RMCARD400 v1.0.2 Release Notes**

### **REMOTE MANAGEMENT CARD FIRMWARE RELEASE NOTES**

#### **Applicable Products: RMCARD400**

Version 1.0.2 (Release Date: May 19, 2023)

#### **New Features**

- Added support for future environmental sensors.

#### **Feature Improvements**

- Modifications were done to improve how content is displayed.

#### **Fixes**

- Corrected issue, when using the serial port, with not being able to log in to the Command Line Interface (CLI) after the Manager IP had been set.
- Fixed an issue with PowerPanel Business not being able to get the UPS model name when connected to the RMCARD400.
- Corrected the PDU Type Value from the SNMPv3 trap.
- Resolves an issue with special characters '--' are not being allowed when setting NTP.
- Corrects an issue where the RMCARD would unexpectedly send a "Utility power failed" event for Smart App LCD (OR) series UPS.
- Fixes an issue where the UPS battery voltage value is displayed incorrectly in PowerPanel Business (PPB).
- Corrects NCL Bank 2 information on the Web Interface that was displayed incorrectly with the following Smart App Online (OL) series UPS: OL8KRTHD, OL10KRTHD, OL12KRTHD, OL8KERTHD, OL10KERTHD, OL12KERTHD, OL8KRTHDIEC, OL10KRTHDIEC, OL12KRTHDIEC.
- Resolves an issue with LDAP was not being able to work when the password length was more than 15 characters.
