

WORKFLOW STATION AND READERS

Transfer video, photos and audio from multiple sources at once

Kingston's Workflow Station and Readers provide a flexible system to transfer video, photos and audio from multiple sources at once.¹ Expedite your post-production workflow and create a file offload setup that fits your needs. The Workflow Station Dock is customisable so you can use only the USB miniHub, SD readers or microSD readers that your shoot requires. Whether you're on a 4K/8K multi-cam shoot with portable audio recorders for each host, or filming B-Roll with drones and GoPros, you can connect up to four readers to the dock simultaneously and transfer footage quickly. The Workflow Station and Readers support USB 3.2 speeds, which get you to your post-production process faster than ever. For added flexibility, the card readers can be used on the go. When you need to shoot on location, simply drop the hub or readers you need into your bag and connect them to your laptop using the included USB-C® cable.

- › Transfer video, photos and audio from multiple sources at once
- › Use the card readers with the dock or on the go¹
- › Flexible system to help future-proof your workflow
- › Incredible USB 3.2 speeds

FEATURES / BENEFITS

Offload files quicker — Transfer video, photos and audio from multiple sources at once.¹

Flexible workflow system — Use only the hub and readers that fit your setup.¹

Portable versatility — Use the card readers on the go via their included USB-C cables.

Incredible performance — Workflow Station products support USB 3.2 speeds that get you to editing quicker.
