## Servicing of Double-Insulated Appliances

A double-insulated appliance is marked with one or more of the following: The words “DOUBLE INSULATION” or “DOUBLE INSULATED” or the double insulation symbol (square within a square).

In a double-insulated appliance, two systems of insulation are provided instead of grounding. No grounding means is provided on a double-insulated appliance, nor should a means for grounding be added to the appliance. Servicing a double-insulated appliance requires extreme care and knowledge of the system, and should be done only by qualified service personnel. Replacement parts for a double-insulated appliance must be identical to the parts they replace.

**To reduce the risk of electric shock**, this appliance has a polarized plug (one blade wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.

**Afin de réduire le risque de choc électrique**, cet appareil est muni d'une fiche polarisée (une des lames est plus large). Cette fiche ne peut être insérée dans une prise polarisée que d'une seule façon. Si la fiche ne peut être insérée dans la prise, retourner la fiche. Si la fiche ne peut toujours pas être insérée dans la prise, faire installer une prise adéquate par un électricien qualifié. Ne pas modifier la fiche.

## GENERAL INFORMATION

## Automatic Motor Shut-Off

To protect from overheating, this vacuum cleaner is equipped with a thermostat which automatically shuts off the motor if it overheats. Should this happen:

1. **Turn off the switch and unplug the cleaner** because the thermostat will allow the cleaner to automatically start running again when the motor cools (approximately 30 minutes).
2. **Check the hose, bag and filter** regularly, as a clogged hose, full bag or dirty filter could cause the motor to overheat.
3. **Call a Sanitaire/Eureka Service Station** if the cleaner will not operate after cooling for approximately 30 minutes.

# HOW TO USE

**CAUTION: Moving parts. Make sure on/off switch is in off position before plugging in.**

A carpet should be cleaned regularly over heavily traveled areas, and once a week over the entire carpeted area. Vacuum slowly, making several passes (forward and backward) over the carpet, covering small areas at a time. The time required to clean the carpet will depend on several factors—including type of carpet and amount of dirt.

## 1 Connect Hose

## 2 Rotate Swivel Hook to release cord

## 3 Plug In

## 4 Store Tools

## 5 Attach Carrying Strap (on some models)

The carrying strap has two safety pin type closures at each end. Fasten each one into the holes shown below on the cleaner.

## 6 Push ON/OFF Switch

(A thermostat automatically shuts the motor off if it overheats, see Automatic Motor Shut-Off)

# Cleaning Accessories

Attach wands and cleaning tools  
(Wands may vary by model)

Slip the circular end of an accessory tool onto the end of the hose handle and twist slightly to secure. If additional reach is needed, place a wand on the hose handle first.

## Telescoping Wand

To adjust the length of the telescoping wand, hold the wand adjustment collar in one hand while pulling or pushing the wand with the other hand until you have the desired length.

**Crevice Tool:** For crevices, corners, baseboards, between cushions.

**Upholstery Nozzle:** For curtains, draperies, cushions, fabrics.

**Dusting Brush:** For furniture, blinds, books, lamp shades, shelves.

**Bare Floor Brush:** For any type of hard surface floor.

\*May be purchased separately.

## HOW TO MAINTAIN

The instructions given in this booklet serve as a guide to routine maintenance. To avoid unnecessary service calls, check the hose, bag and filter often. Clear a clogged hose with the blower, change the bag if it is full, and clean the motor filter when it is dirty.

### Disposable Dust Bags and Filters

The dust bag and motor filter play a very important roll in the efficiency of the vacuum cleaner. The purpose of the dust bag is to trap dirt, but at the same time, the paper bag must be porous enough to allow air to pass through. If the bag or the motor filter become clogged, no air can pass through the cleaner and no cleaning can take place regardless of how powerful the unit is. To keep the cleaner operating at maximum efficiency, change the dust bag frequently and clean the filter as needed. Some fine particles can restrict airflow very quickly and will decrease performance even before the bag appears to be full. For that reason, when vacuuming carpet fresheners or cleaners, powder, plaster dust, or similar fine substances, the bag and filter may need to be changed more often.

### **FILTERAIRE®** Disposable Dust Bag (optional)

Our high filtration bag is a two-layer, disposable bag that combines our standard paper bag with a nonwoven air filter inside. Use a Filteraire dust bag to create a cleaner indoor environment because the bag filters better than our standard bag. The bags are available (three in a package) from your local dealer, or you can call 1-800-800-8975 for other locations. Look for the Genuine Eureka Filteraire dust bag—Style MM PN 60296B.

### How to Remove Disposable Dust Bags—Style MM, PN 60295B

**NOTE:** Turn off vacuum and unplug the electrical cord before changing dust bag or cleaning motor filter. Never operate the vacuum cleaner without the dust bag or filter.

- 1 Turn off and unplug cleaner.
- 2 Open lid by pushing down hood latch.
- 3 Fold BAG CLOSURE FLAP down and push behind rubber seal.
- 4 Insert finger into upper left notch then pull out and remove bag.

## How to Install Disposable Dust Bags—Style MM

**NOTE:** Turn off vacuum and unplug the electrical cord before changing dust bag or cleaning motor filter. Never operate the vacuum cleaner without the dust bag or filter.

1. Turn off and unplug cleaner.
2. Open bag cover by pushing latch.
3. Clean motor filter by rinsing under warm water and let air dry if heavily soiled.

4. Open bag folds slightly.
5. Place bag in cleaner.
6. Tuck bag corners under collar.
7. Swing bag cover closed and push to latch.

## How to Install HEPA Filter (on some models)

Check the HEPA filter with each disposable dust bag change. Replace twice a year or after every six bag changes.

**Upper Filter Tabs**

**Bottom Clips**

Insert upper filter corner tabs firmly under rear housing tabs and pivot filter down until bottom clips on filter click securely into place on the cleaner.

## How to Remove HEPA Filter

Grasp the bottom clips on the filter and pull out and down to release the upper filter tabs from the rear housing tabs on the cleaner.

Replace with filter,  
part number 60666B.
